“The AOCS annual meeting is a place where the focus is to provide the most current and cutting-edge research in the area of oils. In my opinion, their annual meeting provides the highest quality scientific content compared to other societies.”

Michael A. Rodgers, Ph.D., Associate Professor, Graduate Coordinator, Department of Food Science, University of Guelph, Canada
Letter from the CEO

At a recent conference of society CEOs, one of my colleagues said he has stopped using phrases like “the new normal” or “the new reality.” He felt like this implies we’ve reached some sort of new plateau or steady state, and that each year we find that we have to reset our expectations because we never seem to reach a steady state. He suggested we might be better off accepting that we are living in the “discontinuous next.” At first that might seem like a frightening thought, but it shouldn’t be. Yes, we have been forced into a world of change and accelerated adaptation…but we also opened our eyes to a world of opportunities!

We’ve connected with thousands of new scientists and professionals around the world. We’ve created new partnerships with other organizations. We created new ways for our members and other stakeholders to connect at more frequent intervals. We have accomplished this while all of our lives have been completely disrupted by the worst pandemic in over a century.

For lack of a better descriptor, I think “discontinuous next” seems about right. While there are many uncertainties in this paradigm, one thing seems absolutely clear...to be successful in the “discontinuous next” you have to embrace change by finding energy and excitement in the “possibilities” and then focus on the tangible opportunities that will inevitably unfold.

Together, we can make great things happen. We are so excited about the possibilities and opportunities related to the 2022 AOCS Annual Meeting & Expo, our first large-scale, fully hybrid conference. Come join us and connect with your friends, colleagues, customers, future customers, and other exhibitors and sponsors as we embrace the discontinuous next together.
