

The AOCS logo is positioned vertically on the left side of the banner. It consists of the letters 'AOCS' in a bold, white, sans-serif font, with a small asterisk-like symbol above the 'S'. The background of the banner is a close-up, textured image of golden-brown, crystalline or granular material, possibly representing a lipid or a food product.

Lipid Oxidation and Quality

The 2023 AOCS Annual Meeting & Expo is coming up, and you won't want to miss the lipid oxidation and quality program!

Register today

Message from the Chair

Dear Colleague,

Welcome to the Spring newsletter of the AOCS Lipid Oxidation & Quality Division. Your division leaders have been hard at work preparing for the [2023 AOCS Annual Meeting & Expo](#) from April 30 through May 3 in Denver. The heart of the division's meeting, the [Technical Program](#), is in great shape, and I'm confident that you'll be eager to attend. David Johnson, Vice-Chair, and the session organizers have organized sessions ranging from the discovery and development of novel antioxidants to the combination of analytical and sensory measurements.

Marc Pignitter, your Treasurer/Secretary, is leading the Mentorship Program. Mentors and mentees will meet in person on May 2, 1–2:25 pm, in room 302. Those interested are invited to attend. Participating is a great way to expand your trusted contacts and get some wise advice for your career.

I hope you'll be able to join our [social events](#). We'll have a casual gathering for members who are present on Saturday, April 29, starting between 5-6 pm, location TBD within a short distance of the convention center (RSVP to David Johnson if interested – DJohnson@kalsec.com). Thanks to Kalsec for sponsoring this event. The Division Dinner will be held at Earl's Kitchen & Bar (1600 Glenarm Place) at 6:30 pm on Monday, May 1. We'll have a private room, so that will facilitate renewing old friendships and making new ones. To purchase a ticket, log in to the AOCS site ([AOCS Login](#)) and add it to your registration basket. If you have any questions, contact Karen Kesler at karen.kesler@aocs.org.

I look forward to seeing you in person in Denver!

All the best,

J. David Pinkston

Lipid Oxidation and Quality Mentorship Program Update

At our last AOCS annual meeting in Atlanta, we celebrated our inaugural LOQ mentorship program. Targeted to the needs of each individual LOQ member, mentors and mentees were matched successfully. Since then, all participants have experienced what it means to be part of the LOQ-specific mentorship program. Now, we are already preparing for the second round of mentorship to boost your career. For those of you who are engaged as a mentor or mentee in the current round, you might wish to briefly provide some ideas, comments, and feedback to be considered for the next round [here](#).

The second round will start at the Colorado Convention Center in Denver during the AOCS annual meeting. All of you who are currently rewarded by your role as mentor/mentee are also encouraged to continue the second round. You're also free to change your role in the program, if you'd like.

Interested in becoming, or in continuing to be, part of the Mentorship family? Join the Mentorship Lunch on May 2 from 1-2:25 pm in room 302. Lunch is free, but [RSVP](#).
